OTHER PROFESSIONAL ACTIVITY

Co-Founder of *LeeWas* GmbH (Zurich, 2016). This company was created by Lucas Leemann and myself as a spin-off of our joint research on the empirical measurement of public opinion. *LeeWas* runs and analyzes public opinion surveys in Switzerland using large data sets, digital communication channels, and state-of-the-art methods that build on multilevel regression and post-stratification (MrP). Among others, we conduct with Tamedia multiple polling waves on all Swiss referendums and the 2019 national elections. For more on the survey analysis methodology of MrP, see our article in the *American Journal of Political Science* and our book chapter in the *Sage Handbook of Research Methods in Political Science and International Relations* listed above.
